

## Seminar Topics

Each seminar is to run about an hour and teach the class about the subject. Where I have done a first pass on the subject, your seminar should go deeper and focus on areas of interest to the topic contributors. I have scheduled time for 7 seminar presentations (2-3 students in a topic group) and the first few topics will need to be done early in the summer session. You will upload your PowerPoint presentation materials to Blackboard and your Presentation will be recorded.

1. Photovoltaic Power –
  -
2. Wind Power 2– Due 10/16/2017
  - Andrew Stewart
  - Antonio Tello
3. \*Fuel Cells –
  -
4. Geothermal Power –
  - Ravina Hingorani
  - Christina Ochoa
5. \*Tidal and Wave Power –
  - John Knight
  - Sai Madhan Chaduvula
6. \*Micro/Smart Grids –
  -
7. Nuclear Power –
  - Michael Lach
  - Nicholas Delfico
8. Hydro-Electric Power 1 - Coordinate
  - Lynne Duvelson
  - Nick Fraser
9. Hydro-Electric Power 2 – Coordinate
  - Sohail Ginwala
  - Tejaswini Moparthy
10. \*Energy Storage
  -

\* Topic not directly covered in lectures
